

You have requested a building permit in a subdivision where Aquatera Utilities Inc. has not completed a Hydrant Flow Test. Without this test being complete, The City is unable to guarantee adequate fire response. Inspection Services on behalf of The City of Grande Prairie may issue a building permit only after the acceptance of all liability by the Building Contractor in the event of a fire. The City takes no responsibility for your loss in damages, material and/or time in the event of a fire either on OR near your construction site, regardless of the cause, whether it be construction related, vandalism or an act of God.

The City will not issue an occupancy permit until the Hydrant Flow Testing has been satisfactorily completed.

Please complete the information below. Be sure to print clearly. One signed waiver required per permit requested. All signatures to be done in person by an authorized signing authority representing the building contractor at The City Services building and will be witnessed by an Inspection Services staff member.

I \_\_\_\_\_ (Authorized Signing Authority) for  
 \_\_\_\_\_ (Builder) assume all liability for the above noted risk.
